CAREER OBJECTIVE

Motivated and detail-oriented learner with hands-on experience in Python, C++, and data analytics, along with a foundational understanding of JavaScript. Eager to expand front-end development skills and contribute to impactful tech solutions.

WORK EXPERIENCE

Data Analytics • Internship

Apr 2025 - Sep 2025

Renu Sharma Foundation, Virtual

- Analyzed key operational data to identify trends and provide actionable insights supporting decision-making in the Admin Department.
- Built dynamic dashboards and visual reports using Excel and Python to track intern performance, attendance, and departmental metrics.
- Collaborated with cross-functional teams to streamline data collection processes, improving reporting efficiency by 30%.
- Learnt and applied data cleaning, transformation, and visualization techniques to real-world non-profit datasets.

EDUCATION

B.A. Programme, Computer Application

2023 - 2027

School Of Open Learning, University Of Delhi

CGPA: 7.32/10

Senior Secondary (XII), CBSE

2022

Science

Kendriya Vidyalaya

Percentage: 73.00%

Secondary (X), CBSE

2020

Kendriya Vidyalaya

Percentage: 80.00%

TRAININGS / CERTIFICATIONS

Data Analytics

Aug 2024 - Feb 2025

Trainity, Virtual

PORTFOLIO

[GitHub link ↗](#)

PROJECTS

Note Taker Web App

Jun 2025 - Jul 2025

Note Taker Web App

Full-Stack Developer | MERN Stack, Tailwind CSS

- Developed a secure, user-friendly web application allowing users to create, update, and delete personal notes with real-time syncing.
- Implemented user authentication and authorization using JWT to ensure privacy and personalized note storage.
- Integrated MongoDB for persistent storage and Express.js for RESTful APIs to manage note operations efficiently.
- Styled responsive UI using Tailwind CSS for seamless user experience across devices.

Crop Price Prediction (Learning Project)

Dec 2024 - Present

Crop Price Prediction System

Machine Learning Project | Python, Scikit-learn, Pandas

- Built a predictive model to forecast crop prices using historical agricultural data, leveraging regression algorithms such as Random Forest and XGBoost.
- Engineered key features including soil nutrients, weather patterns, and market data to improve prediction accuracy.
- Performed extensive data preprocessing, handling missing values, outliers, and categorical encoding for clean model training.
- Evaluated model performance using RMSE and R² metrics, iteratively fine-tuning hyperparameters to optimize results.

SKILLS

- | | | |
|--------------|------------------|-----------------------|
| • JavaScript | • Python | • Data Analytics |
| • MySQL | • Advanced Excel | • Machine Learning |
| • Node.js | • Tableau | • Backend development |
| • GitHub | | |

EXTRA CURRICULAR ACTIVITIES

- Cricket
- Chess
- Flute

ADDITIONAL DETAILS

- Successfully completed 8+ projects focused on data analysis, visualization, and automation. Known for strong analytical thinking, adaptability, and a passion for continuous learning.

Data Analytics Training

Aug 2024 - Oct 2024

Successfully completed an internship focused on real-world data analytics tasks Analyzed datasets using Excel and SQL, creating dashboards and drawing actionable insights Applied Python libraries like Pandas and Matplotlib to clean data and visualize trends

ExpenseKeeper

Sep 2025 - Present

A full-stack personal finance application that helps users track expenses, visualize spending patterns, and leverage machine learning to predict future monthly expenses across categories. Built with React, Node.js, MongoDB, and XGBoost.
